

Welcome to the Department of Community Health and Health Behavior!

Our graduate level degree programs will prepare our graduates with the skills, knowledge, and research experience to help create healthier communities. As a student, you can customize your curriculum to meet your career objectives, partner with our faculty of renowned public health educators and researchers, as well as collaboratively work with students across the health sciences professions to improve public health outcomes.

This handbook will serve as a resource guide while enrolled in your degree program. For further assistance, please reach out to your academic advisor.
